\* A REER index of 100 should not be misinterpreted as denoting the equilibrium value of the currency. 100 merely represents the value of the currency at a chosen point in time (in this case the average value of the currency in 2010). Therefore, movement of the REER away from 100 simply reflects changes in 2010 and is unrelated to its equilibrium value.

NOTES: -

- From July 2020, PBS has discontinued the dissemination of CPI on base 2007-08 using which the REER index was calculated, and changed the base to 2015-16. For the compilation of the REER index, therefore, the CPI - Base 2015-16 has been spliced and rebased to 2010 using the IMF's methodology.
- RPI and REER indices may be revised due to revisions in base period or splicing factor of CPIs data by PBS.
- Weights and number of trading partners have been revised since Jan-13. The REER and NEER have been recalculated since Jan-13 using these revised weights and number of trading partners. For detailed methodology and old series of REER and NEER, please visit the Revision Study at [http://www.sbp.org.pk/departments/stats/Notice/Revision-Study\(REER\).pdf](http://www.sbp.org.pk/departments/stats/Notice/Revision-Study(REER).pdf)
- Appreciation (depreciation) of REER is sometimes confused with the concept of currency overvaluation (undervaluation) while these are two separate concepts and not necessarily interpreted in the same direction. For an assessment of a country's exchange rate misalignment, a more sophisticated analysis is required taking into account factors such as demographics, external and fiscal sustainability, and some other macroeconomic fundamentals over the medium-term. The following explainer-video on REER [by SBP] goes into further detail. <https://youtu.be/RX00a7oevLg>

Trade data compiled by Pakistan Bureau of Statistics and State Bank of Pakistan may differ from each other due to the following reasons: -

- 1- The SBP Exports (BOP) & Imports (BOP) include general merchandise, repairs on goods and goods procured on parts by carriers. The SBP export and imports are based on realization of export proceeds and import payments made through the banking channel. Information on exports and imports unaccounted for by the banking channel are collected from the relevant sources and added to the exports/imports data reported by banks to arrive at the overall exports and imports. The trade data of PBS is, on the other hand, based on physical movement of goods crossing the custom boundaries of Pakistan.
- 2- The SBP data is generated merchandise based on Balance of Payment Manual (BPM6), whereas PBS data is on Carriage Insurance & Freight (c. i. f.) basis.
- 3- Cumulative figures are of Financial Year (Jul-Jun).

Trade data compiled by Pakistan Bureau of Statistics and State Bank of Pakistan may differ from each other due to the following reasons: -

1. The SBP Exports (BOP) & Imports (BOP) include general merchandise, repairs on goods and goods procured on parts by carriers. The SBP export and imports are based on realization of export proceeds and import payments made through the banking channel. Information on exports and imports unaccounted for by the banking channel are collected from the relevant sources and added to the exports/imports data reported by banks to arrive at the overall exports and imports. The trade data of PBS is on the other hand, based on physical movement of goods crossing the custom boundaries of Pakistan.
- 2- The SBP data is gendered merchandise based on Balance of Payment Manual (BPM6), whereas PBS data is on Carriage Insurance & Freight (c. i. f.) basis.

It is also considered the sum of value added at every stage of production (the intermediate stages) of all final goods and services produced within a country in a given period of time, and it is expressed in monetary terms.

Followings are the three approaches to measuring and understanding GDP:

- i. **Expenditure Based**

Income-based gross domestic product is compensation of employees, plus taxes less subsidies on production and imports, plus gross mixed income, plus gross operating surplus.
- iii. **Output Based**  
Output-based gross domestic product is the sum of the gross values added of all resident producers at basic prices, plus all taxes less subsidies on products.

### **Basic Price**

The basic price is the amount receivable by the producer from the purchaser for a unit of a good or service produced as output minus any tax payable, and plus any subsidy receivable, on that unit as a consequence of its production or sale; it excludes any transport charges invoiced separately by the producer.

**Gross Value added at Basic Prices**

Gross value added at basic prices is output valued at basic prices less intermediate consumption valued at purchasers' prices.

**Gross National Income**

GNI measures the total economic growth of a country and takes into consideration income and taxes earned both internationally and domestically, while GNP only measures the income and taxes earned by domestic citizens.
