*Non-Food Non-Energy, ** SPI for all income groups combined

Source: Pakistan Bureau of Statistics

Notes:

National CPI is computed using the weighted average of Urban and Rural CPIs.

The proportion of urban and rural consumption received through Household Integrated Income and Consumption Survey (HIICS) have been as weights in construction of National CPI.

National CPI is only available at headline and group levels. There is no National WPI, National SPI and National Core Inflation (i.e. NFNE and 20 percent Trimmed).

Annual average = %change in average index during a financial year(July-June) over previous year

Year on Year = %change in index during a month over the corresponding month of previous year

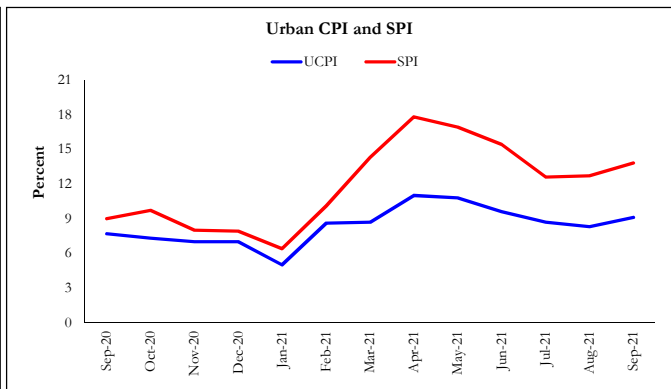

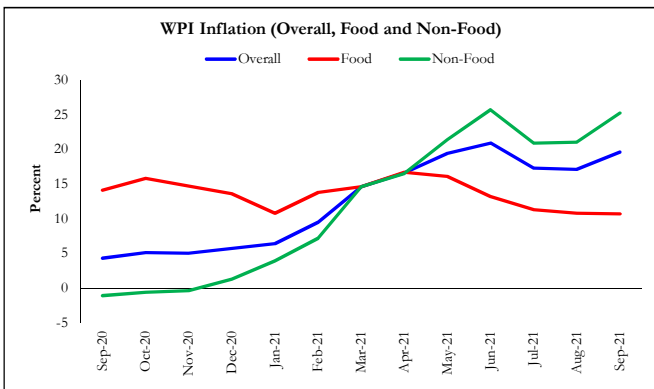

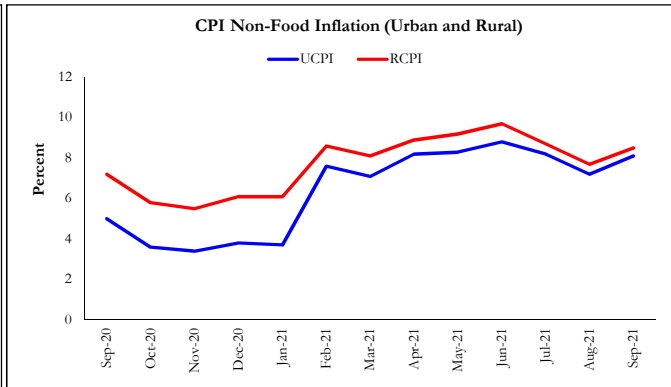

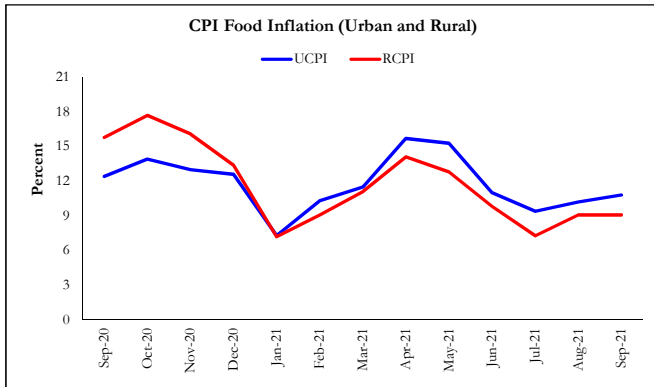

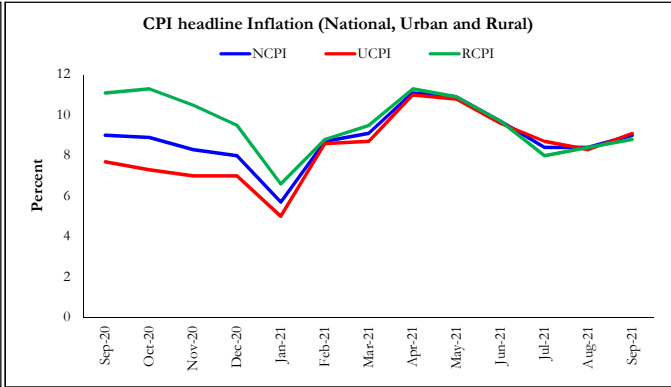

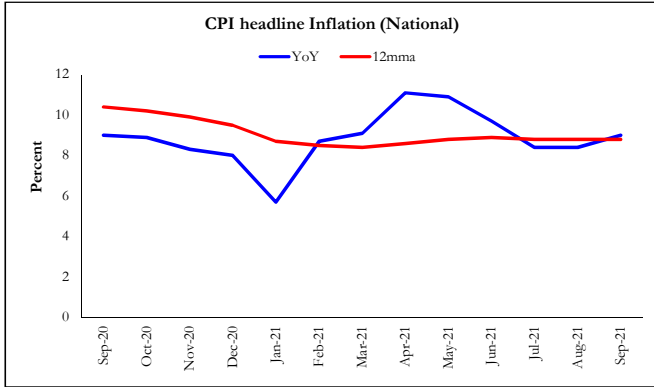

12 month moving average = % change in 12month moving average of index during a month over corresponding month last year

Period average = %change of average index from the period since July to the respective month over corresponding period last year.

Month on Month = % change in index in a month over the preceding month.

@: For the methodology of core inflation-trimmed, see Annexure B of Inflation Monitor at SBP website.
