All Financial Auxiliaries

Dear Sir or Dear Madam

Liabilities & assets statement reporting of- quarterly

We are in persuasion to the goal of achieving the soundness of the financial system for sustainable healthy growth and prosperity of the country, and side by side keeping the pace with the international community to strengthen the architecture of the international financial system. This requires an efficient statistical system for acquisition and dissemination of data based on internationally acceptable standards, customized to country practices and meeting to the requirements of maximum stakeholders.

Paving the way to this destination, we being responsible for the compilation of Monetary and Financial Statistics and Flow of Funds Accounts of Pakistan have initiated the implementation of internationally accepted standards of quality and compatibility. The Monetary & Financial Statistics Manual (MFSM2000) of IMF harmonized with United Nations System of National Accounts 1993 (SNA93) provides guidelines to the compilation of these statistics. This would require expanding the coverage, frequency and layout of our data collection.

To this end, we are expanding the coverage of data collection regarding liabilities and assets from financial auxiliaries on quarterly basis. In this regard your cooperation will be appreciated. The data collected from all institutions will be treated as confidential and will be used only for compilation of necessary statistics. We are enclosing "[Reporting Guide for Financial Auxiliaries](#)" explaining the areas of various classifications, sectorizations and terminologies. This Guide includes questionnaire for reporting, the concepts and definitions along with guidelines for reporting.

This statement will be effective from the quarter ended December 2004 and on regular basis for subsequent quarters in future. Last date for the submission of the statement is 20th of the month following the quarter for which data is reported. For the first statement, last date for the submission of data is 31st March 2005 as this is new job for the financial auxiliaries.

We welcome any suggestions for improvement, comments and clarifications in this regard. You may contact us through fax # 92-21-9212569 or at e-mail addresses of the MFSM implementation team provided in the guide.

Yours truly

-Sd-

PREFACE

Harmony of understanding the concepts and definitions amongst the data providers, compilers and end users is of vital importance for adopting the internationally accepted best practices in the compilation and dissemination of statistics and data comparability with the external world.

The Monetary and Financial Statistics Manual (MFSM 2000) is harmonized with the System of National Accounts 1993 (SNA93) of the United Nations like other Manuals of the IMF for the compilation of various statistics. We are switching to the guidelines provided for the compilation of monetary and financial statistics in “Monetary and Financial Statistics Manual (MFSM 2000)” of IMF, the base document to be followed by the member countries. This would lead to broaden our area of coverage for data collection on monthly basis from the financial sector institutions not yet covered. The matchless efforts of the Statistics Department of State Bank of Pakistan in adopting standard best practices of data collection, compilation & dissemination would provide a sound base of timely, reliable and exhaustive set of data of the financial sector to cope with the national responsibility for providing the sound footings with quality data to the policy makers, which ultimately would result stable and consistent policies for the stability and prosperity of the county. This would also raise the image of the county among

the nations. These data are of great utility for State Bank of Pakistan for preparing and implementing its policies side by side meeting the requirements of the international community and the researchers.

This guide, the “Reporting Guide for Financial Auxiliaries” is aimed at facilitating the concerned officials for accurate and efficient reporting in the questionnaire. The guide has also been made available for convenience of all the concerned institutions at the link

<http://www.sbp.org.pk/departments/stats.htm>

The team expects warm response from the data providers as commitment to the nation to make our data bases strong. The data bases are the assets of the nation and are useful for the variety of stakeholders. The team of “The Implementation of MFSM2000” project wishes to acknowledge, with thanks, its indebtedness for the guidance of the Director Statistics and valuable contributions made by officers of Flow of Funds Division, Mr. Muhammad Irfan of Planning and Development Division, Statistics Department, State Bank of Pakistan.

INTRODUCTION

PURPOSE OF THE GUIDE

1. In view of the exposed weaknesses in the international financial system, highlighting the fact that globalization brings risks as well as important benefits to the international community mobilized to strengthen the “architecture” of the international financial system. An important element of the "architecture" initiative involves the development and implementation of internationally accepted standards.
2. The IMF developed standards or codes of good practices in its main areas of responsibility in consultation with experts from the member countries and international standard setting bodies to guide member countries in the dissemination of economic and financial data to the public. These standards—the Special Data Dissemination Standard and the General Data Dissemination System—comprise a number of elements of good practice in data dissemination. As an essential complement to, and outgrowth of, these standards, the IMF intensified efforts to assist countries through the development of internationally agreed guidelines on statistical methodology in the field of Balance of Payments, Government Finance, and Monetary and Financial Statistics. The concepts set out are harmonized with those of the System of National Accounts 1993.
3. Statistics Department, State Bank of Pakistan is revising the data collection requirements for the coverage of leftovers of the financial sector institutions and the dimensions of financial instruments in lines with the Monetary and Financial Statistics Manual (MFSM2000), to go side by side with the international community. The purpose of collecting these data are for estimating monetary and financial aggregates for an effective monetary policy and useful indicators of the soundness of the financial system and honour the international commitments as a member country.
4. The main purpose of the reporting guide is to steer the respondents for reporting the data on monetary and financial statistics in lines with the Monetary and Financial Statistics Manual (MFSM2000) of IMF. It

- can be useful for other stakeholders since it covers the conceptual framework, definitions, harmonized with the United Nations' System of National Accounts 1993 - SNA93.
5. We assume that the guide would be helpful for reporting data (Annexure III). *The suggestions for improvement are welcome.*

VALUE ADDITION

 - a. Data compatibility
 - b. Data quality and accuracy

II. CONCEPTUAL FRAMEWORK

Monetary and financial statistics consist of a comprehensive set of stock and flow data on the financial and non-financial assets and liabilities of financial corporations. The organization and presentation of monetary and financial statistics follow a hierarchical approach based on general data frameworks— sectoral balance sheets, surveys and flow of funds statement.

A. SECTORAL BALANCE SHEETS

The purpose of the sectoral balance sheets is to provide a framework for the collection and presentation of data in a format that facilitates the presentation of flow of funds and monetary accounts for the financial corporations sector. The data for a sectoral balance sheet are obtained from the individual institutional units within a financial corporations sub-sector and are classified into standard components, in accordance with the sectorization, instrument classification, and accounting principles. In addition, sectoral balance sheets are directly useful for analyses requiring sub-sector data that are more highly disaggregated than the asset and liability categories shown in the corresponding financial sub-sector surveys. The structure of the analytical accounts of the other financial corporation's survey is given in Annexure I.

B. SURVEYS OF FINANCIAL CORPORATIONS

These surveys utilize, and rearrange into analytical presentations, the data in the sectoral balance sheets. These surveys comprise:

- Central bank survey (CBS)
- Other depository corporations survey (ODCS)
- Other financial corporations survey (OFCS)

The two higher-level surveys based on the above surveys are: -

- o Depository corporations survey - DCS (CBS and ODCS are consolidated to obtain DCS)
- o Financial corporations survey – FCS (CBS, ODCS and OFCS are consolidated to obtain FCS)

C. FLOWS OF FUNDS STATEMENT

Financial statistics consist of a comprehensive set of stock and flow data on the financial assets and liabilities of all sectors of an economy and between these sectors and the rest of the world. The financial statistics are developed within the framework of the SNA93, which provides for comprehensive coverage of production, distribution, and all non-financial and financial stocks and flows for the total economy as well as for each its sectors. The broad components of the 1993 SNA are the:

- Current accounts
- Accumulation accounts
 - Capital account
 - Financial account
 - Other changes in assets account
 - Revaluation account
 - Other changes in volume account

Balance sheets that together provide an integrated system for measuring economic flows and the resulting stocks of non-financial and financial assets and liabilities

- Opening balance
- Changes in stock positions
- Closing balance

Flow of funds data, presented in a matrix form showing the financial transactions among all sub-sectors of an economy, are a particular focus of the financial statistics. Fully articulated flow of funds statements are, in essence, extensions of the financial account into three-dimensional matrices that show the transactions in financial assets and liabilities among sectors / sub-sectors and non-residents. The components of basic and detailed flow of funds account are provided in Annexure-I.

D. SECTORIZATION OF ECONOMY

Institutional units differ with respect to their economic objectives, functions, and behaviour and are grouped into sectors that include units with similar characteristics. The

units of the economy are grouped into the following mutually exclusive institutional sectors:

i) RESIDENT UNITS

FINANCIAL CORPORATIONS

1. Central bank (State Bank of Pakistan)
2. Other depository corporations
 - a. Deposit money corporations
 - b. Other deposits accepting institution

NON-PROFIT INSTITUTIONS SERVING HOUSEHOLDS (NPISH)

II) REST OF THE WORLD (NON-RESIDENT UNITS)

Financial assets are financial claims (e.g., currency, deposits, and securities) that have demonstrable value. MSFM and the 1993 SNA define financial assets as a subset of economic assets— entities over which ownership rights are enforced, individually or collectively, by institutional units and from which economic benefits can be derived by holding or using the assets over a period of time. Most financial assets are financial claims arising from contractual relationships entered into when one institutional unit provides funds to another. Despite the absence of a corresponding liability, monetary gold and SDRs are also considered to be financial assets. Transactions in non-monetary gold are treated as transactions in non-financial assets.

E. CLASSIFICATION OF ASSETS/LIABILITIES

FINANCIAL ASSETS (ASSETS/LIABILITIES)

- Monetary gold and SDRs (this is the holding of central bank)
- Currency and deposits
- Securities other than shares
- Loans
- Shares and other equity
- Insurance technical reserves
- Financial derivatives
- Other accounts receivable / payable

NON-FINANCIAL ASSETS

- Produced assets
 - Tangible fixed assets
 - Intangible fixed assets
 - Inventories
 - Valuables
- Non-produced assets
 - Tangible produced assets
 - Intangible produced assets

F. RESIDENCY CRITERIA

Residence is particularly important attribute of an institutional unit in the macro statistical systems including the monetary and financial statistics because the identification of transactions between residents and non-residents underpins the system for compiling country statistics. The concept of residence is based on transactor's centre of economic interest. An institutional unit has a centre of economic interest and is a resident unit of a country when from some location, dwelling, place of production, or

other premises within the economic territory of country, the unit engages and intends to continue engaging, either indefinitely or over a finite period usually a year, in economic activities and transactions on a significant scale. The one-year period is suggested only as a guideline and not as an inflexible rule.

G THE PRINCIPLE OF ACCRUAL ACCOUNTING

Transactions are recorded when economic value is created, transformed, exchanged, transferred, or extinguished. Claims and liabilities arise when there is a change in ownership.

III. FLOWS

A. ECONOMIC TRANSACTIONS

A *transaction* itself is defined as an economic flow that reflects the creation, transformation, exchange, transfer, or extinction of economic value and involves changes in ownership of goods and/ or financial assets, the provision of services, or the provision of labor and capital.

B. TRANSACTION CHANGES

3. Net of loans disbursed and repaid by the financial auxiliaries during the reporting period (Assets)
4. Net of acquisition and disposal of liability in the shape of borrowings during the reporting period (Liabilities)
5. Net investment in securities other than shares i.e., securities purchased minus securities matured/ claimed during the reporting period (Assets).
6. Net of securities issued and redeemed during the reporting period (Liabilities).
7. Net investment in shares and other equity of corporations i.e., total shares acquired *minus* shares disposed off during the period (Assets).
8. All subsequent changes in the paid-up capital through issuance of shares (Liabilities)
9. Receivable/payable items generated during the reporting period
10. Total insurance premium paid for the subsequent period *minus* premium consumed during the reporting period and outstanding claims that have to be settled with the insurance corporations— Insurance Technical Reserves (Assets).
11. Non-financial asset acquired during the reporting period after adding the cost of ownership transfer if born by the financial auxiliaries *minus transferring* of non-financial asset to another entity by sale or gift after deduction of cost of ownership transfer if born by the financial auxiliaries.

C. VALUATION CHANGES

Holding gains or losses resulting from changes in market prices, exchange rate changes and fair value where market is not available that accrue during the accounting period to owners of non-financial/ financial assets and liabilities e.g., in case of securities in foreign currency, the difference due to prevailing exchange rate and exchange rate at the time of opening balance.

D. OTHER CHANGES IN VOLUME

Changes in non-financial and financial assets and liabilities during an accounting period those are not due to transactions or revaluations. These include changes arising from reclassification of sectors / instruments, exceptional and catastrophic events, including destruction from disasters or illegal seizure of assets without compensation etc. Examples: -

1. Uncompensated seizures due to non-payment of taxes, fines or similar levies.
2. Reclassification of securities that have been converted into shares.
3. Loan changed as grant etc.,
4. Writing off of loan by the banks due to bankruptcy or other factors etc;

DEBENTURES

Long-term securities that give the holders the unconditional right to one or both of: (a) a fixed or contractually determined variable money income in the form of coupon payments, i.e. payment of interest is not dependent on earnings of the debtors, (b) a stated fixed sum as a repayment of principal on a specified date or dates when the security is redeemed.

accrued interest (i.e., interest earned but not yet due for payment). Such valuation is herein referred to as the book value of a loan.

The loan valuation is not adjusted for expected losses. The value of a loan portfolio should be adjusted downward only when (1) loans are actually written off as un-collectible or (2) when the outstanding amount of the loan has been reduced through formal debt reorganization.

Loans are categorized as short-term and long-term loans.

vi. SHARES AND OTHER EQUITY (ASSETS)

All instruments and records acknowledging claims to the residual value of companies / corporations, after the claims of all creditors have been met are categorized as shares and other equity. Stock or share most commonly refers to a share of ownership in a company that entitles the owner of that share to literally a share in the ownership of the company, including the right to a fraction of the assets of the company, a fraction of the decision-making power, and potentially a fraction of the profits, which the company may issue as dividends. Preferred stocks or shares are included in this category. Mutual funds and NIT units are also to be included under this category, for the

reason that they give rise to the equity of issuing institution. Financial auxiliaries' investment in shares and other equity as assets are to be reported separately as quoted and non-quoted.

QUOTED SHARES - ORDINARY

Shares are usually traded on a stock exchange, where people and organisations may buy and sell shares in a wide range of companies. A given company will usually only trade its shares in one market, and it is said to be quoted, or listed, on that stock exchange. However, some large, multinational corporations are listed on more than one exchange. They are referred to as inter-listed shares.

NON-QUOTED SHARES - ORDINARY

The shares those are not traded on a stock exchange are defined as non-quoted shares.

PREFERRED STOCKS / SHARES

makes the investor a part-owner of that company whose shares it has bought. At the end of the accounting period when the balance sheet is drawn up, parts of the insurance premium payable during the accounting period are intended to cover risks in the subsequent period. These prepayments of premiums are assets of the

policyholders and form part of the insurance technical reserves. Total premium paid for the subsequent period less premium consumed during the reporting period would be reported.

OUTSTANDING INSURANCE CLAIMS

These are the amounts that financial auxiliaries expect to receive in respect of claims that are not yet settled or claims that may be disputed with insurance companies.

SUSPENSE ACCOUNT

It is a temporary holding account for errors and omissions i.e., claims for which proper classification has not yet been determined, claims for which verifications, notifications, instructions, or other documentations are required for completing the transactions, and claims that are under litigation or otherwise in dispute.

PREPAYMENT OF TAXES

DEFERRED COST/PRELIMINARY**OPERATING EXPENSES**

This relates to the cost incurred for subsequent periods, which are reflected as ASSETS.

ix. NON-FINANCIAL ASSETS

Entities from which their owners may derive economic benefits by holding them or using them over a period of time are called non-financial assets. Non-financial assets consist of tangible assets, both produced and non-produced, and intangible assets for which no corresponding liabilities are recorded. Produced assets comprise non-financial assets that have come into existence as outputs from production processes.

Produced assets consist of:

- i. Fixed assets—assets that are used repeatedly, or continuously, in production processes for more than one year and that may be tangible (dwellings, other buildings and structures, machinery and equipment, and cultivated assets, such as livestock for breeding and plantations) or intangible (mineral exploration, computer software, and entertainment, literary, or artistic originals),
- ii. Inventories (materials and supplies, work-in-progress, finished goods, and goods for resale), and
- iii. Valuables (assets that are acquired and held primarily as stores of value).

Non-produced non-financial assets

are those that occur in nature and over which ownership may be enforced and transferred. These are both tangible and intangible assets that come into existence other than through processes of production.

Tangible non-produced assets include land, subsoil assets, water resources, etc

Intangible non-produced assets include patents, and purchased goodwill etc.
