- Debt and liabilities show end-period outstanding stock positions and debt servicing reflects principal and interest payments during the period.
- Principal repayments on domestic debt being recurrent and large in nature are not reflected as these appear in some cases, even higher than stocks.
- For conversion into rupees from US dollars, weighted average customer exchange rates prepared by Domestic Markets & Monetary Management Department have been used for stocks and average rates for debt servicing.
- Since the monthly data on External Debt and Liabilities for the last year is not available therefore YoY growth is based on the stock of end June of previous year. However, for quarter end, stock of the corresponding month of the previous year has been used.
- Average of PBS (base 1999-00) GDP estimates at current market prices of FY12 and revised FY11 GDP has been used to calculate Debt/GDP ratio for July 2011 to onward.
