Section VI – Schedule of Requirements/Services

1. Background:

IT Group of SBP receives Automation Requests for the development of various systems, software applications, web portals and Apps from various business domains of SBP and its subsidiaries. Most of these requirements are fulfilled either through enhancements in the existing software systems implemented in SBP or by developing new applications using the already available development platforms in SBP. These software platforms mainly include:

- i. Oracle Application Express. (Oracle APEX)
- ii. Oracle Forms and Reports.
- iii. Oracle Database (SQL, PL/SQL and SQL*Loader Languages & Tools)

To accelerate the pace of automation and software development projects using contemporary project management methodologies (such as Agile, Rapid Application Development, etc.), SBP intends to sign up a service contract with highly professional, competent and reputable software houses/firms/companies working in Pakistan under applicable procurement process. The current estimation of such projects is around 50; however, the selected firm will be required to complete additional projects that may emerge during the currency of the Framework Agreement, on the same terms & conditions and agreed rates.

2. Services Scope:

Service requirements include:

- a. Develop complete new application(s) in any and/or combination of the above-mentioned platforms.
- b. The development required to implement enhancements in existing Systems on any or combination of these platforms

The efforts of typical Software Development Stages will include but are not limited to the following:

- i. Understanding and converting business requirements (provided by SBP) into technical requirements in coordination with SBP's business and IT Analysts. (System Requirement Specification (SRS) development)
- ii. Design, Change or Extend (for enhancements) existing Data Architecture and/or Database design
- iii. Developing Application's User Interface (UI/UX), Forms, Reports, Menus Options, Stored Procedures, Controls, and plug-ins
- iv. Implementing IT Security controls at various layers as per requirements
- v. Recommending and applying /enhancing Operational performance and Security Configurations wherever required
- vi. Integrate systems through design and development of interfaces between systems as per requirements
- vii. Perform Complete Quality Assurance of development including Unit, Smoke, Functional, Integration, Performance and Operational Testing
- viii. Perform Application Code Security Assessment using standard, compatible tools
- ix. Coordinate with SBP Teams for conducting User Acceptance Testing, User Training and fixing gaps identified during UAT
- x. Provide Coordination and Assistance for preparing environments for different stages such as UAT, Production deployment.
- xi. Provide necessary documentation for the whole cycle including Project Plan, SRS, SDS, Architecture Design, Technical Manual, Quality Assurance Plan/Test cases, Bug/Fault Report, User Manual as per requirement.
- xii. Technical support and knowledge transfer of the implemented system to SBP teams to enable them to handle techno-functional support and maintenance afterward.

- xiii. SBP will provide Development Environment and access to the selected bidder, however, the selected software house/ firm/company may also utilize their development kits, utilities, tools and setups to complete the development assignments. However, remote access to SBP Test or Production Environments will not be provided.
- xiv. For On-site working at SBP, sitting arrangements as per SBP's standards and protocols will be provided to the development team working on the given assignment.
- xv. For QA, Security Assessment and testing, the selected bidder may be required to bring in their tools, unless otherwise mandated by SBP.

PART 2 – SUPPLY/EXECUTION REQUIREMENTS

A. Scope of Supply/Services

- As mentioned in **Section VI** above.

B. Delivery Schedule of Services

- To be mutually agreed between the Client and Service Provider for each assignment.
