Procurement of Cloud Hosting Services for the State Bank of Pakistan

Clarification Regarding RFP Document

Queries	Responses
We need to inquire about the DNS services they require. I need clarity and an explanation of what exactly they want in DNS. For example, do they need authoritative DNS or just a normal DNS entry, and what type of DNS services are they looking for?	It is referring local DNS service with-in Cloud / VPC environment.
RFP Page:52 form 2:Price schedule *Requirement type: Monitoring Services* *Description: Access Logs and usage monitoring services.* Do SBP need OS-level access logs, service-level access logs, or application-level access logs? Which one is required? Please explain.	• Access logs track and record every access request made to cloud resources. • Monitoring services refer to Usage monitoring services which tracks the consumption of resources and activities within cloud environment. e.g. resource utilization, cost tracking.
Can we submit two bids as in one by OEM and second via JV through partner?	A Cloud Service Provider shall submit only one Proposal, in the Bidding process. However, Joint Venture is not permissible as per Clause 3.1 of Proposal Data Sheet (PDS). Further, a Cloud Service Provider can participate either as Principal or allow its authorized agent.
The amount registration certificate should be of Partner or OEM in case of JV?	Necessary explanation provided above.
